

**EQUIPMENT DATA SHEET - 10**  
**SYNCHRONOUS POWER ROLL CONVEYOR**

- Pallet transfer by simplex chain with pitched latch assemblies.
- Pallet supported and guided on standard non-drive rollers, mounted in aluminum side frames.
- Chain driven via an electric geared motor, located at end of section.
- Chain assembly tensioned through a siding assembly position at opposite end to drive unit.
- Section supports include adjusting screw to allow final leveling of equipment on installation.
- Equipment includes all side guards to prevent finger traps.
